

LEANG LYHOUR

CLOUD SECURITY ENGINEER

Teuk Thla, Sen Sok, Phnom Penh, Cambodia | leehourdev@gmail.com | +85578870993 | [GitHub](#) | [LinkedIn](#)

SUMMARY

Cloud Security Engineer with hands-on experience in security research, technical documentation, and full-stack web development. Currently performing cloud security engineering for enterprise AWS environments — designing remediation strategies, authoring bilingual technical deliverables (EN/JA), and building operational security frameworks. Background in full-stack web and mobile development.

EXPERIENCE

Cloud Security Auditor (Remote — Japan)

2026 — Present

Enterprise cloud security engagement across multi-account AWS infrastructure with Trend Micro Vision One / SWP stack.

- Designed WAF bot triage methodology (rDNS + UA + behavioral analysis) — adopted as formal operational standard
- Authored remediation plans for policy misconfigurations that caused ~47h production outage
- Delivered technical reports (EN/JA) covering EBT remediation, RBAC, SNS architecture, agent migration
- Designed allowlist governance framework (ledger format, quarterly review cycle, status workflow) for WAF IP management.
- Used Claude Code as primary research and drafting environment for AI-assisted security analysis.

Freelance Full-Stack Web Developer

2023 — 2026

- Built and deployed web and mobile applications including CRM/CMS systems with user access control and content workflows.
- Integrated third-party APIs (Google Maps, SMS gateway, Telegram bot, ABA PayWay payment API).
- Managed full project lifecycle: client requirements, design, development, deployment, and maintenance.
- Selected projects: ABA QR Generator (PayWay API), React Tattoo Studio (React + Firebase), Uber clone (real-time Maps API), Food delivery app (Deliveroo-style UI + Sanity CMS). More at github.com/leehourr.

SKILLS

Cloud & Security	AWS Security, Trend Micro Vision One / SWP, CIS Benchmarks, NIST 800-53, OWASP
AI Tooling	Claude Code, AI-assisted security research, RAG workflows
Frontend	React.js, Next.js, React Native, Tailwind CSS, Nativewind, TypeScript, JavaScript
Backend & Databases	PHP Laravel, Node.js, Express, NestJS, MySQL, SQL Server, MongoDB, Redis, RESTful APIs
Dev Tools	Git, GitHub, GitLab, Docker

EDUCATION

ITPEC FE Certification

Fundamental Information Technology Engineer — In progress

IT Step Academy

Software Engineering — Web development, databases, networking fundamentals.
